PAYMENT POLICY
Policy ID: PAY-001
Version: 1.0
Effective From: 2026-01-01
Status: Active

1. Payment Verification
A payment must be verified through the approved payment/account system before it is treated as completed.

2. Customer Claims Payment Was Made
Ask for the approximate payment date, amount, and transaction reference when available. Then verify through the payment system.

3. Partial Payment
Do not assume that a partial payment clears the outstanding EMI. Retrieve the outstanding balance from the account system.

4. Payment Channels
Only communicate payment channels configured for the customer's account/product. Never fabricate links or account details.

5. Receipt
A receipt or transaction confirmation should be generated by the approved payment system.

6. Disputes
If the customer reports an incorrect balance or duplicate charge, create or route the case for verification instead of arguing with the customer.

7. Security
Never ask customers to disclose passwords, PINs, OTPs, card CVVs, or other authentication secrets.
